

TSBE
TECHNOLOGIES FOR
SUSTAINABLE BUILT
ENVIRONMENTS

Technologies for Sustainable Built Environments Centre

Working with industry,
building a low carbon future

Our research

Buildings

Carbon reduction in new
and existing buildings
Sustainable design and construction

Climate impact

The impact of climate change on
the built environment

Informatics and systems

Control systems for building and
energy management

Energy

Energy supply systems
Renewable energy

Design and materials

Sustainable materials and digital
design innovations

Sustainable behaviours

Driving change in occupant behaviour
and sustainable communities
