

Where do you see yourself in four years' time?

Working for a world-leading
manufacturing company?

As an industry leader and global expert
in manufacturing technology?

Working on strategically important
manufacturing technology research projects?

Then you need to consider an Engineering Doctorate
www.manufacturingcdc.ac.uk

You will: Work with a sponsoring company on one of their strategic research projects
Have the opportunity to use and spend time at the Manufacturing Technology Centre (MTC)
Receive support and training from academics at three leading universities
Receive a very generous stipend

We are working towards acceptance of the EngD for accelerated progression towards Chartered Engineer status.

Rolls-Royce, Airbus, Aero Engine Controls and the MTC are strategic partners committed to sponsoring and working with research engineers. We are actively seeking additional manufacturing partners.

Visit our website or contact the Centre Manager for further information or an informal discussion.
